asana

Grow in ways you never thought possible, while driving impact alongside supportive teammates.
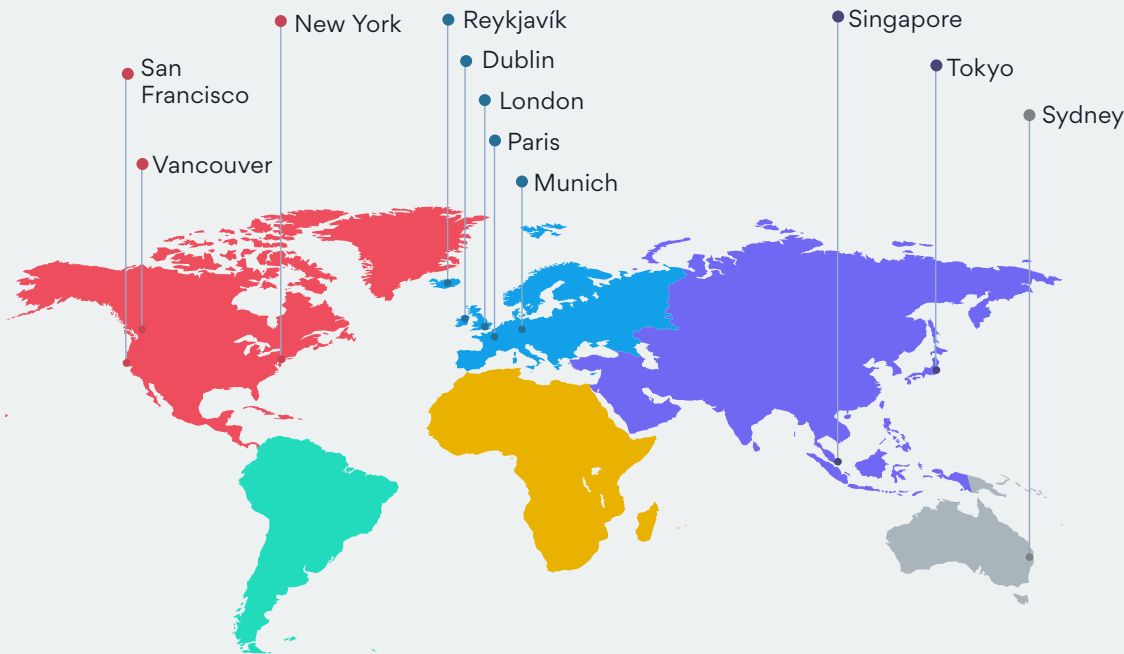

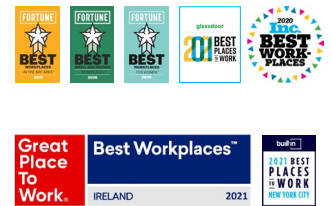

A culture where you can thrive

At Asana we treat our culture like a product, one that deserves intention, attention, design, and upgrading just as much as any product feature. You will be welcomed into an inclusive, welcoming, and fun place to show up every day. This culture stems from our exceptional leadership and we continue to receive industry recognition for it!

Grow with us

Being in a phase of fast growth where change is a constant, every day brings new problems to solve and new opportunities for you to make an impact. You will be trusted to move work forward, own making decisions, and drive impact. A supportive environment that challenges you to do great things, fast, and practice mindfulness as we grow and scale, will set you up for success.

See even more reasons why there has never been a better time to join Asana.

Engineering at Asana

Do great things, fast

We aim to build, operate, and scale the most useful software for the world's teams. We're fascinated by productivity and thrive on solving problems together that help people achieve their most ambitious goals. We're always thinking about the future, and are excited about building technology that is a force for positive change in the world.

Celebrating and supporting our individual identities

Asana upholds a diverse and inclusive environment where everyone feels like they are respected, valued, and that they belong. Together as a company, we're building a better way to work by creating both a product and a corporate culture that support transparency, trust, and inclusion.

Inclusivity with Employee Resource Groups:

asana women

Lifting up the work and passions of women in tech

BLACSANA

Create a safe community for all Black employees that supports their development, celebrates their successes, and leverages their knowledge in support of Asana's mission

TEAM RAINBOW

A space for LGBTQIA+ people and allies

asanapac

Celebrate and empower our Pan Asian and Pacific Islander (PAPI) community

Gradient

Cultivating community for people of color and allies

Internships at Asana

Pillars of our University Programs

Our 12 week internship program is built to give students hands-on experience to develop and work on complex and challenging problems. Paired with a mentor, you'll work on real projects that affect our growing product everyday. Our teams are committed to your learning and growth and ingraining you in our hardworking and mindful culture.

Our Interns work all across our engineering organization including mobile, product infrastructure, data, and data science!
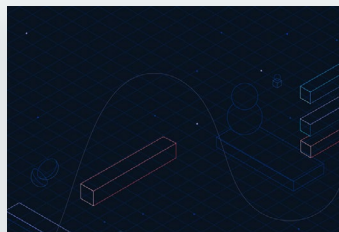

Develop new code on our growing codebase

Experience co-creating with a mission-driven team

Learn from experienced leaders at an established, growing company

Make an impact that you can see right in front of you

Connect	Develop	Build	Experience	Challenge	Learn	Grow	Impact

Connect with teammates & create meaningful, lasting relationships

Build our product & processes that will help Asana scale

Challenge yourself with new technologies & a broad scope of responsibility

Grow your foundational skills with a team that supports you
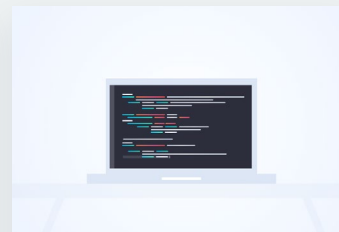

Our Engineering Teams

Why I joined Asana

Product: Build the Asana web and mobile application using a customer-driven approach to iterate and evolve our product to meet the needs of teams everywhere.
